

Sr. No	Module	Description about the Feature
1	Authentication & User Management	Secure login/logout with role-based access
2	Authentication & User Management	Add staff/users with permissions and access levels
3	Authentication & User Management	Attendance tracking: open camera on login for face capture/verification
4	User & Staff Management	Add new staff members with basic details (name, email, phone, role)
5	User & Staff Management	Upload profile photo (optional)
6	User & Staff Management	Assign department/position
7	User & Staff Management	Predefined roles (Admin, Manager, Supervisor, Staff)
8	User & Staff Management	Custom role creation with specific permissions
9	User & Staff Management	Different modules/features visible based on role
10	User & Staff Management	Grant/restrict access at module level (Orders, Billing, Stock)
11	User & Staff Management	Fine-grained permissions: Create, Read, Update, Delete (CRUD)
12	User & Staff Management	Temporary permissions (time-based access)
13	User & Staff Management	Unique login credentials for each user
14	User & Staff Management	Two-factor authentication (optional)
15	User & Staff Management	Auto-logout after inactivity
16	User & Staff Management	Camera capture at login for attendance verification
17	User & Staff Management	Log of user login/logout times
18	User & Staff Management	Record of actions performed (who created/edited/deleted records)
19	User & Staff Management	Audit trail for compliance
20	User & Staff Management	Enable/disable user accounts
21	User & Staff Management	Password reset by admin or self-service
22	User & Staff Management	Session management (force logout)
23	Production Management	Track production batches and status
24	Production Management	Monitor resource usage vs planned output
25	Production Management	Maintain production history and performance reports
	Raw Material Stock Management	Manage stock of raw materials with real-time updates
1	Raw Material Stock Management	Track minimum stock levels and get low-stock alerts
2	Raw Material Stock Management	Generate usage and wastage reports
3	Multiple Godown Stock Management	Maintain stock separately across multiple godowns/warehouses
4	Multiple Godown Stock Management	Inter-godown transfer tracking
5	Multiple Godown Stock Management	Consolidated stock overview
6	Billing & Payments	Generate invoices for orders
7	Billing & Payments	Manage customer payments and dues

8	Billing & Payments	Integrate with credit management system
9	Order Receiving & Management	Record and track new customer orders
10	Order Receiving & Management	Update order status (pending, processing, completed)
11	Order Receiving & Management	Customer order history view
12	Employee Tracking	Track employee activities and log working hours
13	Employee Tracking	GPS or system-based tracking for field employees
14	Employee Tracking	Attendance integrated with login system
15	Customer Insights	List of customers who did not repeat orders in the last 10 days
16	Customer Insights	List of customers whose order quantity decreased in the past 10 days
17	Customer Insights	Customer engagement reports for sales follow-up
18	Credit Management	Track customer-wise credit limits and outstanding balances
19	Credit Management	Auto-reminders for overdue payments
20	Credit Management	Credit utilization reports
21	Preparing the design for the Software	
22	Responsive Website - Mobile, iPad, Desktop	
23	Testing of Complete Project
